

# Call for Papers and Organized Sessions

## MIASA Policy Conference

### “Accelerating Africa’s economic transformation towards shared prosperity and sustainability”

---

**Organized by:** Merian Institute for Advanced Studies in Africa (MIASA), at the University of Ghana, Legon/Accra, Ghana

**In collaboration with:**

Institute for Statistical, Social and Economic Research (ISSER), University of Ghana  
German Institute for Global and Area Studies (GIGA), Germany  
Kiel Institute for the World Economy, Germany

**Keynote speeches/roundtable participants:**

Stefan Dercon, Centre for the Study of African Economies, University of Oxford (virtual)  
Kevin Chika Urama, African Development Bank, tbc  
Mavis Owusu-Gyamfi or Edward K. Brown, African Centre for Economic Transformation (ACET)

**Program Committee:**

Charles Ackah, ISSER  
Jann Lay, GIGA, MIASA and University of Goettingen, Germany  
Abena Oduro, MIASA and University of Ghana  
Rainer Thiele, Kiel Institute for the World Economy, Germany

**Time and location**

November 21-22, 2023; ISSER Conference Hall, University of Ghana (and virtual)

## Concept and contents

This second MIASA policy conference on (21-22 November 2023) is meant to provide a space for **exchange between researchers, policy makers, development practitioners and other stakeholders in development** to present and discuss the most recent policy-relevant research findings on Africa's economic development, its present patterns and future.

Africa's economic development is at the cross-roads. The 20 pre-pandemic years have been – for some parts of Africa – the most transformative since independence. Yet, there is a long way to go. First, the transformation needs to regain its momentum to lead to **sustained increases in productivity, income and living standards**. Second, its patterns must turn **more inclusive** to ensure that the potential gains from development are shared more equally. Third, a **sustainable economic transformation** in Africa can contribute to addressing global as well as local environmental problems, from climate change to deforestation and biodiversity loss. Fourth, development strategies will have to **adjust to** and be compatible with **global changes**, including the global energy transition and the geo-political tensions with repercussions on international trade and investment, which entail challenges and opportunities. Fifth, **economic integration** – both regionally and globally – has to turn into a major driver of sustainable development. While achieving higher value addition is an important element of integration strategies, more sustainable commodity exports and mineral extraction should remain high on the agenda.

The conference is not only meant to bridge research and practice. It also encourages researchers and practitioners to step out of their respective silos and see, interpret and apply their knowledge in the broader context of Africa's economic development without losing analytical rigor. All too often, **applied research gets lost in detail** and is too obsessed with identification with the consequence that it does not see the forest for the trees. At the same time, **policies rely on broad narratives** that are not well backed by empirical evidence.

This is why we ask researchers in particular to make an effort to situate their findings within broader issue areas of high relevance to economic development in Africa (and beyond). One aim of this conference is therefore to bring together bigger research projects and initiatives and put together a program that goes well beyond a series of paper presentations.

Specific topics that we intend to cover in the conference include but are not limited to:

- Sustained productivity/income growth
- Building productive capacity: Infrastructure, debt, and how to leverage private investment
- Contemporary macroeconomic challenges
- Structural change, role of trade and foreign direct investment
- Equity and inequality, including progressive tax/transfer/social policies
- Regional and global integration
- Sustainable supply chains
- Climate mitigation and development, energy transition
- Just transition
- Financing for sustainable development

We plan to have **coherent thematic sessions** on selected topics that may include one or several contributions from larger research efforts/projects or be organized by one institution or project. We might then “fill” these sessions with contributed papers. Further, we plan to have keynotes, a high-level policy panel, and a poster session with designated discussants for each of the presented posters.

## Contributions and submissions

Research projects or groups that work on topics relevant to the conference themes are invited to submit proposals for **organized sessions** (with up to 3 speakers). Organized session proposals should include a session title, a very brief description of the session (max. 100 words), and at least two papers/presentations (speaker names, title of papers, abstracts of not less 500 words).

We also accept submissions of **individual research papers**. Papers will be selected on the basis of papers or abstracts of not less than 500 words. Priority will be given to empirical research with clear implications for policy design and implementation. Individual papers can be selected for presentation in parallel sessions or for a poster session.

Please email your submissions to **iaa.MIASA@giga-hamburg.de** in a pdf or Word file and indicate 'MIASA policy conference 2023' in the subject heading. The **submission deadline is August 30, 2023**. Notification of acceptance will be sent out by September 20, 2023.

If you have queries on the content of the conference and your potential contribution, please contact Jann Lay under [jann.lay@giga-hamburg.de](mailto:jann.lay@giga-hamburg.de).

## Support

We can provide **travel costs and accommodation** (meals will be provided in the hotel and during the conference, we cannot pay per diems) to selected participants, with preference given to participants based in Sub-Saharan Africa. Please indicate in your submission whether you need such support.
